Summary

--> An Experienced Full Stack Developer (JavaScript-ES6, DOM manipulation, React.js, Node.js, Express, Webpack, Redux, NPM, Typescript, Git, Next.js, RESTful API Design, Software Testing using Jest, SQL, PostgreSQL/MongoDB, CI/CD Pipelines, Git Actions, Docker, HTTPS, AWS Lambda & services, Experience with designing secure distributed systems, Prod & Deployment, System Design, Software Architecture) more inclined towards Frontend development.

--> 5 Years of Experience in designing, developing, deploying and managing highly scalable Products, with good knowledge of monoliths and microservices and as a Tech Lead and software architect.

--> In-depth understanding of software development lifecycle from initial planning to deployment and maintenance phase.

--> Work closely with the team inclusive of talented PMs, exceptional Backend Engineers and awesome UI-UX designers. Contribute to every step of SDLC starting from the vision, till the execution

--> Experience of performing code reviews with mentoring & leading technical teams and Writing Documentation.

Experience

🌐 Technical Lead and Software Architect

DocVita

Mar 2022 - Aug 2022 (6 months)

• Working directly with CTO & leading the team of developers to scale product.

• 5+ years of experience with good knowledge of monoliths and microservices.

• Delegate tasks to developers & lead the development of architectures for complex solutions. Ensure consistency with specified requirements agreed by all the stakeholders.

• Experience with non-functional requirements, such as reliability and availability, scale, horizontal scalability, etc. over time and make tech stack decisions accordingly.

• Familiarity with SQL, NoSQL databases: MongoDB, PostgreSQL. Understand data storage requirements

• Accomplish engineering & organization mission by completing related results as needed.

• Ensure strong compliance with TDD, SOLID, DRY and define success criteria for testing & product acceptance. Ensures the quality & reliability of deliverables

• Document and demonstrate solutions by developing documentation, flowcharts, layouts, charts, code comments and clear code.

• Gather feedback from customers & make appropriate plans to develop features.

CINTA Technical Lead

Cinta Medtech

Mar 2021 - Mar 2022 (1 year 1 month)

• Deciding the frontend architecture

• Pushing the code to live server (Staging/Prod)

• Leading the team of developers

• Manage and overseas all phases of technology development

• Guide, train and supervise developers and engineers
• Suggest and implement solutions for process improvement. Performing code reviews and mentoring junior developers.
• Maintain and improve website performance & Optimize applications for maximum speed

Senior Web Developer
Cinta Medtech
Jul 2020 - Mar 2022 (1 year 9 months)
• Building the product from scratch using MERN STACK (www.zury.in)
• Become a part of team for code review.
• Collaborate with back-end developers and web designers to improve usability. And with mobile developers to build mobile-responsive websites
• Liaise with designers to decide on UI/UX elements
• Develop all the UI pages using extensive markup and scripting languages (HTML, DHTML, JavaScript and CSS).

Web Developer
Railofy
Sep 2019 - Aug 2020 (1 year)
• Worked as a Founding Engineer
• Successfully build and deployed The entire scalable web application which was made on MERN stack
• After finalizing the design of frontend, Used React.js for making web pages.
• Utilize tools, technology and various methodologies to create functional and intuitive solutions for user interfaces of desired products

Web Developer
Freelancer.com
Dec 2018 - Nov 2019 (1 year)

Web Developer
InWara Inc
Jan 2018 - Dec 2018 (1 year)

Education

Techno India University
Bachelor of Technology, Computer Software Engineering
2014 - 2018

Skills

Technical Leadership • MERN Stack • JavaScript • Next.js • Amazon Web Services (AWS) • Systems Design • Databases • Scalability • TypeScript • Software Architecture
